ABOUT ME

I am a junior front-end web developer with the ability to learn and collaborate in rapidly changing environments. I have spent hundreds of hours learning technologies like HTML, CSS, JavaScript, React JS, and bootstrap... I have a good understanding of APIs, how they work and many more.

I challenge myself every day while staying focused on achieving high-quality results under strict deadlines. I am eager to obtain a challenging position at a prestigious company like Dream Version that will expand my learning and build upon my developer skills.

I am excited to provide my services to a company or agency so I can grow my skills while facilitating their improvements.

SUMMARY

- ★ Self-independent, reliable and friendly individual who works hard to achieve his goals.
- ★ Adaptable quickly, and organized well. Interested in learning the latest web and software technologies quickly.
- ★ Able to work well in teams as well as individual. My future goal is to become a senior full-stack developer.

MY SERVICES

- Static Website
- Dynamic Website
- Web application
